SEMINAR SERIES, ORGANIZED BY Dr Renata Serra

Panel 1: "Population Growth and Climate Change" Professor Matt Turner and Dr Leif Brottem of Grinnell College presented

The Sahel Research Group and the France-Florida Research Institute hosted a one-day Symposium titled "**Demography and the Challenge of Social Change in the Sahel**". Speakers came from different disciplines including demography, public health, geography and anthropology. In the picture above, Prof Abe Goldman with Prof Matt Turner. Panel 2: "Population Growth and Climate Change" Professor Matt Turner and Dr Leif Brottem of Grinnell College presented. The panel before that was on Population Growth and Climate Change. The third and final panel was on Gender and Climate. Below are a few shots from the event .

Afternoon panel on Gender & Climate

... quick consultations

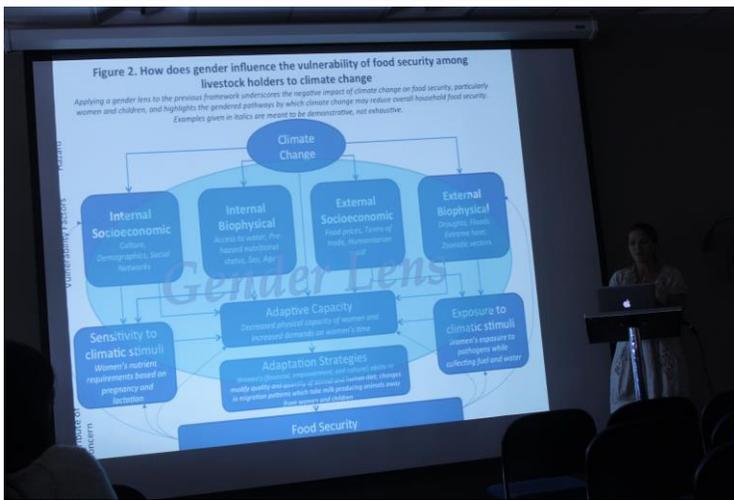

....after the presentation, time to go

Looking to the future

**Sahel Research Group Symposium –
 Demography and the Challenge of
 Social Change in the Sahel.**

The Sahel Research Group at the University of Florida is a collaborative effort to understand the political, social, economic and cultural dynamics of the countries of the West African Sahel. Our focus is primarily on the six Francophone countries of the region—Senegal, Mauritania, Mali, Burkina Faso, Niger and Chad. We are also interested in developments in neighboring countries, to the north and south, whose dynamics frequently intersect with those of the Sahel. The Sahel Research Group brings together faculty and graduate students from various disciplines at the University of Florida, in collaboration with colleagues from the region.
